

Product: ropeAID

Product description:

The ropeAID is a specialized aid device which was developed exclusively to support the user when retrieving long lengths of rope, e.g. after training or rescue operations.

The device is not fitted with a brake and is explicitly **not approved as PPE**. It may therefore not be used as an evacuation, rescue or access device.

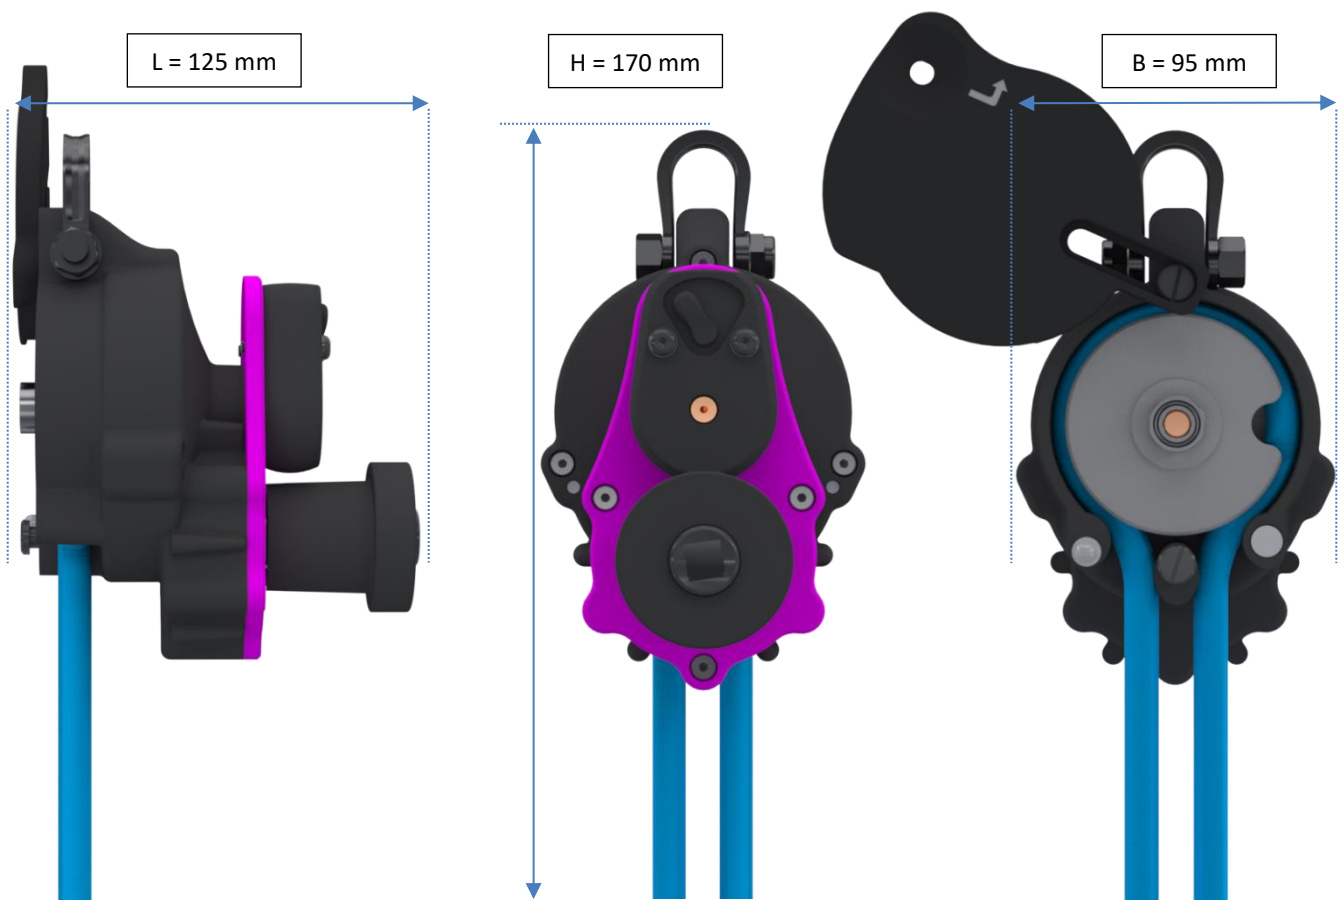

The ropeAID may only be used for retrieving ropes and not for lifting other loads.

The device uses proven technology and the following features:

1. patented **STOPsafe** backstop
2. **AUTOdrive** for use with any commercially available cordless screwdriver
3. rope change in seconds with **QUICKchange**

Locations of use include wind turbines, cranes, gondolas, lifts, buildings, towers and similar.

Please note that the maximum permissible load of 50kg must not be exceeded.

Technical data:

Device application:	ropeAID
Ropes	Ø 6 to 11 mm
Certification - Conformity:	NONE
Max. descending height:	NONE
Max. rated descending load:	NONE
Min. rated descending load:	NONE
Max. Nominal lifting load:	50 kg (only rope weights)
Max. Lifting height:	∞
Max. Descending work:	NONE
Descending speed:	NONE
Temperature range:	-40°C to +60°C
Dimensions H x W x L:	170 x 125 x 95 mm
Device weight (net):	1.6 kg
Item number:	181600
Customs tariff number:	84253900
