

Product: Full body harness

Type: MKA20 DuoFit & TriFit (EN/ANSI)

Product description

Full body harnesses are equipped with various fall arrest and holding eyelets. A rear fall arrest eyelet in the back area is suitable for work when the anchor point is above or behind the person to be secured. Harnesses with a frontal fall arrest eyelet in the chest area are suitable for work when the anchor point is above or in front of the person to be secured. For use in retaining systems and positioning for work, the MKA20 type is equipped with additional side holding eyelets. These are only suitable for holding or retaining functions, but not for fall arrest functions.

MKA20 DuoFit ⇒ **item number** **181110** (S/M) **181120** (L/XL) **181130** (XXL)

MKA20 TriFit
(with climbing eyelet) ⇒ **item number** **181090** (S/M) **181070** (L/XL) **181080** (XXL)
