Product:Rescue stretcherType:RsqTec TURTLE transform

## **Product description**

The rescue stretcher is a combination of patient transport device and lifebelt and has been tested and certified according to DIN EN 1497:2007 and DIN EN 1865-1:2015 clause 5.4.1. The connecting components in the rescue harness are tested in accordance with ANSI/ASSP Z359.12-2019.

RsqTec TURTLE transform has been developed for the rescue of injured persons from rooms with difficult access. The rescue system is used for the horizontal and vertical transport from exposed positions for rope and air rescue. The special feature of this rescue stretcher is its length variability. It can be used in short version (**without** leg support) and in longer version (**with** leg support).

RsqTec TURTLE transform  $\implies$  Item number: 200200

Technical specification:				
Dimension:	length ls* inside = 1200 mm			
	length ls* outside = 1850 mm			
	width = 700 mm			
	Height to anchor point			
Dimensions:	<b>A</b> : 850 mm			
(pack size in carrying	1100x400x2		10 mm	
bag)				
Weight (1):	10 kg (without accessories)			
Max. nominal load:	140	140 kg		
Lifetime:		10 years		
Environmental	Min.		Max.	
Temperature:	- 40 - 40	-	+ 60 °C + 140 °F	
Appl			+ 140 F	
Application areas: rescue from wind turbines and various				
confined spaces, rescue from high and down				
Standards:				
DIN EN 1497:2007		Rescue harnesses		
		Specification for general		
DIN EN 1865-1:2015		stretcher systems and		
(clause 5.4.1)		patient handling		
		equipment		
ANSI/ASSP Z359.12-2019		Connecting components		
Suggested accessories:				
Vacuum system with waterproof bag (2)				
Neck support pillow (3)				
*ls = leg support
